Enlist E3™ Soybeans: QUICK FACTS & APPLICATION GUIDELINES

Overview: The Enlist™ system in soybeans

<table>
<thead>
<tr>
<th>Soybean trait</th>
<th>Enlist E3™ soybeans</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trait provider</td>
<td>Corteva Agriscience™, Agriculture Division of DowDuPont</td>
</tr>
<tr>
<td>Herbicide tolerances</td>
<td>2,4-D choline, glyphosate, glufosinate</td>
</tr>
<tr>
<td>Authorized herbicides</td>
<td>Enlist Duo® herbicide (2,4-D choline &amp; glyphosate blend) Enlist One™ herbicide (2,4-D choline)</td>
</tr>
<tr>
<td>Key weeds controlled</td>
<td>Common ragweed, giant ragweed, lambsquarters, marestail¹, morningglory, pigweed (including Palmer amaranth¹), velvetleaf, waterhemp and more</td>
</tr>
<tr>
<td>Drift profile</td>
<td>Minimized potential for physical drift (up to 90% reduction compared with traditional 2,4-D, when used with labeled low-drift spray nozzles)</td>
</tr>
<tr>
<td>Volatility profile</td>
<td>Near-zero volatility (up to 96% reduction compared with 2,4-D ester)</td>
</tr>

</table>

¹ May require a broader management plan including timely application and use of a soil residual herbicide.

Use as part of a program approach:

- **Start clean with tillage or burndown**
- **Plant Enlist E3™ soybeans**
- **Apply soil residual herbicide**
- **Apply Enlist herbicides** No later than R2 or full flowering stage
- **Apply glufosinate herbicides** No later than R1 or beginning bloom

Learn more about Enlist E3 soybeans

Learn more and find your local Regional Seed Company at [www.agventure.com](http://www.agventure.com) or by calling **1-888-999-0859**. On the back, learn about applying Enlist herbicides.
BEFORE SPRAYING

1. Application Window
No later than R2 or full flowering stage.

2. Tank-Mix Partners
Check EnlistTankMix.com for qualified tank-mix products.

3. Nozzles
Use only nozzles and pressure combinations listed on the product label.

4. Wind Speed, Weather
Target application at wind speeds greater than 3 mph, but less than 10 mph. Do not apply at wind speeds greater than 15 mph. Don’t spray during a temperature inversion.

5. Susceptible Crops
Only spray when the wind is blowing away from susceptible crops listed on the product label, including cotton without the Enlist™ trait, tomatoes, grapes and cucurbits. Do not spray if the wind is blowing toward a susceptible crop.

6. Sensitive Area
Maintain a 30-foot downwind buffer when the wind is blowing toward a sensitive area (e.g., woods, pastures, grass ditches, lawns).

7. Sprayer Contamination
Make sure sprayer is clean from prior applications before using Enlist herbicides to avoid tank contamination.

APPLICATION

8. Spray Pressure
Verify spray pressure based on the product label and current conditions. Ground speed, product volume and nozzle selection all factor into the appropriate spray pressure.

9. Spray Rate
Enlist Duo® herbicide: 4.75 pt./A
Enlist One™ herbicide: 2 pt./A

10. Spray Volume
Apply a spray volume of water ranging from 10 to 15 gal./A for best results.

11. Boom Height
Consult the nozzle manufacturer for optimum boom height (usually 24 inches or less above crop canopy).

12. Cleanout
After applying an Enlist herbicide, make sure to clean-water flush sprayer with 10% of tank volume and triple-rinse when application is complete.

Call 855-ENLIST1 (855-365-4781) with questions about proper handling and use of these products or if you become aware of potential misuse of incidents involving these products. This reference guide is not a substitute for reading the label for Enlist One™ and Enlist Duo® herbicides. Please read before application each corresponding label, which can be accessed on Enlist.com/Herbicides. Always check your state regulations and follow all state requirements for Enlist™ herbicides.

The Enlist™ weed control system is owned and developed by Dow AgroSciences LLC. Enlist E3 soybeans were jointly developed by Dow AgroSciences and MS Technologies. Enlist Duo and Enlist One herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One herbicides are the only 2,4-D products authorized for use in Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions.
