

Enlist E3™ Soybeans: QUICK FACTS & APPLICATION GUIDELINES

Overview: The Enlist™ system in soybeans

Soybean trait	Enlist E3™ soybeans
Trait provider	Corteva Agriscience™, Agriculture Division of DowDuPont
Herbicide tolerances	2,4-D choline, glyphosate, glufosinate
Authorized herbicides	Enlist Duo® herbicide (2,4-D choline & glyphosate blend) Enlist One™ herbicide (2,4-D choline)
Key weeds controlled	Common ragweed, giant ragweed, lambsquarters, marestalk ¹ , morningglory, pigweed (including Palmer amaranth ¹), velvetleaf, waterhemp and more
Drift profile	Minimized potential for physical drift (up to 90% reduction compared with traditional 2,4-D, when used with labeled low-drift spray nozzles)
Volatility profile	Near-zero volatility (up to 96% reduction compared with 2,4-D ester)

¹ May require a broader management plan including timely application and use of a soil residual herbicide.

Use as part of a program approach:

APPLY WITH CONFIDENCE

Review before spraying to ensure successful applications. For detailed instructions, visit Enlist.com/Apply. Always follow all label requirements.

BEFORE SPRAYING

1. Application Window

No later than R2 or full flowering stage.

2. Tank-Mix Partners

Check EnlistTankMix.com for qualified tank-mix products.

3. Nozzles

Use only nozzles and pressure combinations listed on the product label.

4. Wind Speed, Weather

Target application at wind speeds greater than 3 mph, but less than 10 mph. Do not apply at wind speeds greater than 15 mph. Don't spray during a temperature inversion.

5. Susceptible Crops

Only spray when the wind is blowing away from susceptible crops listed on the product label, including cotton without the Enlist™ trait, tomatoes, grapes and cucurbits. Do not spray if the wind is blowing toward a susceptible crop.

6. Sensitive Area

Maintain a 30-foot downwind buffer when the wind is blowing toward a sensitive area (e.g., woods, pastures, grass ditches, lawns).

7. Sprayer Contamination

Make sure sprayer is clean from prior applications before using Enlist herbicides to avoid tank contamination.

APPLICATION

8. Spray Pressure

Verify spray pressure based on the product label and current conditions. Ground speed, product volume and nozzle selection all factor into the appropriate spray pressure.

9. Spray Rate

Enlist Duo® herbicide: 4.75 pt./A
Enlist One™ herbicide: 2 pt./A

10. Spray Volume

Apply a spray volume of water ranging from 10 to 15 gal./A for best results.

11. Boom Height

Consult the nozzle manufacturer for optimum boom height (usually 24 inches or less above crop canopy).

12. Cleanout

After applying an Enlist herbicide, make sure to clean-water flush sprayer with 10% of tank volume and triple-rinse when application is complete.

Call 855-ENLIST1 (855-365-4781) with questions about proper handling and use of these products or if you become aware of potential misuse of incidents involving these products. This reference guide is not a substitute for reading the label for Enlist One™ and Enlist Duo® herbicides. Please read before application each corresponding label, which can be accessed on Enlist.com/Herbicides. Always check your state regulations and follow all state requirements for Enlist™ herbicides.

The Enlist™ weed control system is owned and developed by Dow AgroSciences LLC. Enlist E3 soybeans were jointly developed by Dow AgroSciences and MS Technologies. Enlist Duo and Enlist One herbicides are not registered for sale or use in all states or countries. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One herbicides are the only 2,4-D products authorized for use in Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions.
